use_all_linters *Setup a lintr configuration file with all linters explicitly enabled*

Description

Setup a lintr configuration file with all linters explicitly enabled

Usage

```
use_all_linters(..., dir = ".", overwrite = FALSE)
```

Arguments

...	Not currently used.
dir	Directory to create the <code>.lintr.R</code> file within.
overwrite	Should an existing <code>.lintr.R</code> file be overwritten.

Examples

```
dir <- tempdir()
f <- try(use_all_linters(dir = dir))
if (!inherits(f, "try-error")) {
  unlink(f)
}
```
